# Welcome!

**Gulf Coast Landscaping Services, Inc.**

Making sure your home or office always puts its best foot forward is our #1 priority at Gulf Coast Landscaping Services. From start to finish, GCL Services can take care of all your outdoor environmental needs.

Whether you are building your dream home and want its first landscape to be the best, or if your old yard needs a whole new look, concept to

completion is just a phone call away.

GCL Services has worked with clients

as small as the single homeowner to Kellogg-Brown and Root (the fourth largest defense contractor). We are licensed, bonded, and insured, as well as being both a state and national government approved contractor. We also maintain a good standing membership with the local chapter of the Better Business Bureau.

Our highly experienced and talented Supervisors and Crew Leaders can always help answer your questions on-site and our outstanding customer service and full-time designer will make sure no matter when your question arises we can help.

# Site Preparation and Demolition

## Land Clearing

We can help you get started with complete lot clearing services and pay absolute attention to every detail.

Every layout can be tailored to your exact specifications, and adjusted to suit every customer and their individual needs.

**Manual Tree Extraction:** We offer a more economical solution to our customers by using manual tree extraction. Each lot can quickly and safely be cleared completely by manual extraction at an hourly rate. This is not only more competitive, but is almost as efficient as using heavy machinery and can offer a more pleasing finished product.

**Heavy Equipment Extraction:** Bulldozers and backhoes can also be used if you prefer, the hourly rate is not as cost efficient as manual extraction, but can be completed in a timelier manner.

Dun-Rite Tree Removal is a GCL Services strategic partner

## Waste Debris Removal

With various ways for waste debris removal, we can work with any customer to help them decide which alternative will better serve their needs.

**Waste Debris Containers:** Often waste containers are used to consolidate and transport waste. The benefit of using waste containers is

careful loading, better concentration of materials, and better time management on pickup.

**Landscaping**

**Water Features**

**Hardscapes**

**Lighting**

**Other Services**

**Dump Trailer Hauling:** In some case it is more economical or convenient to use dump trailers or dump trucks. The advantage of this method is quick loading, and removal from premises. A drawback to this method is empty space, and time required for transport.

## Demolition

We also offer partial and complete demolition. Heavy machinery can be used to remove buildings, structures, and other materials.

**Partial Demolition:** This service is great for customers who may require only specific structures or portions of structures to be removed. This would include additions or specified areas of buildings

**Complete Demolition:** Complete demolition is total removal of all structures within outlined premises.

## Tree Removal

One of our primary services is as a complete tree removal company. You can be assured that every job will have complete attention to detail and will be completed above the customer's specifications.

Every job will be completed in a timely, and professional manner. With roughly fifteen years experience, we use various techniques to safely complete the job in a timely manner. We have at our disposal; lifts, cranes and climbers. This allows for the lowest chance of property damage and injury while providing the customer with the quickest and most efficient method of tree removal.

Being Tapco insured, we give the customer peace of mind with a \$1,000,000 policy and while we have never filed a claim, you can rest easy being assured you are completely covered just in case.

## Grade

The foundation of your landscape is its grade. From the initial grade for the house to the final

grade for the landscape, we can make sure the grade of your landscape works for you. Grade should be both functional and aesthetically pleasing. It is important

to make sure it both helps keep excess water away from your house while channeling where it needs to go and providing a nice

level yard with contoured beds.

All of our turf grasses are quality grasses provided by Woerner Turf.

## Sod

As we move up in building your dream yard we have to decide on what type of turf. No

matter what type of sod, from Augustine to Zoysia we have you covered. So if you want the lush

green thickness of St. Augustine, the foot friendly softness of Bermuda, the low maintenance and hardiness of Centipede, or the all around durability and sharp looks of Zoysia we can help you to decide what is best for you and your lawn. All of our turf grasses are of top quality and

purchased locally from Woerner Turf so you know your lawn will get a great start.

Of course getting your lawn started is only the beginning. GCL Services is always happy to provide you with all of the information you need to maintain that lawn, and if you ever have a question, just give us a call and we will stop by and help you diagnose your problem and solve it. With our help, you can have a beautiful and enjoyable lawn for years to come.

## Plants and Shrubs

If turf is your landscape's carpet then the plants and shrubs are the paint for the walls!

All of our plants are nursery quality and guaranteed to grow locally. Our full time designer can help you choose colors and textures to make sure you have the privacy you desire, and plenty of color year around. We can help you choose plants that are low maintenance or more formal, lots of fragrance or no fragrance. If you have a favorite plant or look, we can put together a plan that will take both into account. Your landscape should be a reflection of you and your taste and we can use the entire pallet of plants to make that reflection beautiful year-round and for years to come.

### FLORAL TREE GARDENS

is our main source of locally hardy nursery quality plants.

## Trees

Trees are the anchors of any landscape project and whether it is a maple tree for shade or a palm to give your yard that tropical resort

feel, big or small we can take care of you. So if you would like a small tree with room to grow or if you need a large tree for instant gratification it is not a problem. We can even special order

specimen trees to add that special look to your yard. Be the first on your block to have that special touch on your landscape.

# Water Features

**Welcome**

**Site Preparation and Demolition**

**Landscaping**

**Water Features**

**Hardscapes**

**Lighting**

**Other Services**

Now that you have a great landscape in place let's add in those extras that take it to the next

level! You may want to consider a nice water feature. Water features can add a whole other dimension to your landscape — sound! Few things are more relaxing at the end of the day than the sound of running water as it gently cascades off a waterfall or meanders slowly through a calm stream bed as it dips lazy in and out of the small inlets that mother nature herself would be proud of. Best of all, with today's technology water features are easier to maintain than ever and some can even be basically maintenance free.

**GCL Services** uses proven techniques to create any custom waterfall or boulder you can dream of!

## Natural Ponds

Our ponds can be created completely from all natural stone to help bring a little touch of nature right into your own back (or front) yard. Natural Ponds are their own ecosystem with living plants and live fish that work together in the circulated water environment to give you your own soothing outdoor aquarium or your children their very own interactive learning environment.

## Waterfalls

A nice quiet pond is an excellent way to help relax at the end of the day, but what if you want something on a little larger scale? GCL Services can create a waterfall that will truly be an inspiration to you. Our waterfalls can be standalone with or without a pond

**Lighting**

**Other Services**

and can even be incorporated into your pool or spa. These custom falls can be made large enough to climb on or small enough to fit into the

quaintest little nook in your back yard to add just a little sound and elegance.

## Streams

Once you have "gotten your feet wet" in water gardening you may decide you want even more waterworks to play with. A stream just may be the answer. Rolling streams or slow moving water, a stream can really bring all the best features of the great outdoors right into your own yard. Bridges of wood or natural stone can even add further interest and enjoyment, not only bringing nature to you, but allow you to become an integrated part of your very own water wonderland.

Custom stone can take almost any everyday object and make it extra special

## Fountains

If you don't have the space or desire for such a large water garden, have no fear. GCL Services offers a huge variety of prefabricated fountains in a wide range of sizes. For that extra special touch we can even design a fountain from scratch or take some of your favorite statuaries or artwork and create a fountain that is truly all your own. We have created custom fountains from almost any object you can think of, so let your imagination be your guide!

# Hardscapes

## Patios

Tired of your old boring, gray cement patio? Need a new patio? Try one from

natural stone or pavers. Natural stone can be cut in regular shapes to simulate pavers or brick or left natural and pieced together like a puzzle for that truly organic look. Of course the best part is you can have it created to your specifications and to suit your specific needs. Any shape, any size, make your patio your own.

**ConPave**

GCL Services is proud to use Conpave blocks and pavers.

## Retaining Walls

When it comes to adding that extra dimension or taming that wild slope, nothing beats a well constructed retaining wall. Whether creating a raised bed or making street access easier, a well constructed retaining wall can add both interest, beauty, and functionality to your landscape.

## Stone Paths

For beauty and durability you just cannot beat the look and versatility of natural stone. GCL can incorporate natural stone into paths, retaining walls, patios and even fencing. From boulders in the landscape for extra texture and weight, river rock for dry creek beds, to flat and stack stone patios and paths you can really have it all.

Finally! The coupe degreas' of your landscape!

There is absolutely no better way to top off a wonderfully landscaped yard than with an

outstanding lighting package. Romantic lighting, utility lighting, or lighting for entertaining, an artistic lighting package let's you, your family and friends enjoy your landscaping even at night.

GCL Services proudly uses HADCO Lighting materials, made in the USA.

Using the myriad of fixtures, bulbs, and accessories built by Hadco right here in the USA we can make your home the shining star of your

neighborhood year around and with adjustable light settings you can set the tone. Low level lighting can make for the perfect romantic evening at home, or step it up a notch for an evening barbeque with the family. Having a holiday party and want to make use of you "outdoor rooms", just step it up another level and everyone can enjoy the fun and beauty of your landscape with complete safety and security.

Automated controls make saving energy easy and control a breeze. You can even

have special lighting scenarios set up for holidays or different times of the year. With today's hectic pace, lighting allows you to step outside and enjoy the serenity of nature even when the sun does not cooperate.

## FENCES AND DECKS

GCL Services can install any number of different

**Panhandle Metal Fabrications, Inc.**

types of fences and decks. Wooden privacy fences, brick, stone or metal are all available. Just let us know

Panhandle Metal Fabrications is a GCL Services strategic partner

what you need and we can design and build it for you.

## MOSQUITO CONTROL

Don't let mosquitoes keep you from enjoying your yard! Keep your yard safe with our all natural, pet and family friendly misting system.

**Mist-A-Fyer Mosquito System**

## IRRIGATION

Be sure to take care of your new landscape by having a quality RAIN BIRD automatic irrigation system installed.

**RAIN BIRD**

GCL uses all commercial parts for extra longevity and consistent worry free operation. We also design each system

especially for your landscape. Rotor heads, spray heads, or drip irrigation can all be added to make sure each part of your landscape gets the water that it needs while

minimizing waste. You can even add a fertilization system to ensure that your plants consistently receive the amount of nutrients they need to always look their best.

## DESIGN SERVICES

The secret to success for any landscaping project is planning. It is a creed we live by. GCL Services is proud to provide you with a completely custom design and plan for your landscaping project. Using some of the most advanced landscaping design software, we are able to help you shape your landscape until we have come up with your dream design. We then step

Thank you for viewing this PDF

back, let you know exactly how much it will cost and help you make any changes. You do not have to make any of these decisions on your own. Then, once you are satisfied we will sit down with you and develop a plan to install your landscape. Whether the plan is a 5 year, 5 month or 5 day plan, we will help you understand the most efficient way to implement the plan so that you, or us, can get you enjoying your new landscape just as soon possible.

## NEED MORE? JUST ASK!

While this has covered the basics of our main services, we cover most any of your outdoor needs. Consultations to Clean-ups, Maintenance to Mulch, if you have an outdoor problem we should be able to help you, and if we can't we will be happy to help you find someone who can. We will do our part to take care of your landscaping needs, so you can do yours — ENJOY!
